

CORPORATE DATA

Operations in Japan

	Start of Operations	Land Area (1,000 square meters)	Main Products	Location (Prefecture)
Headquarters	1949*	294	Monolithic carriers, integrated circuit wafers, and applied electronic products	Aichi
Ikeda Plant	1965	103	Radiators and oil coolers	Aichi
Hiroshima Plant	1965	33	Radiators and radiator fans	Hiroshima
Anjo Plant	1967	407	Starters and alternators	Aichi
Nishio Plant	1970	1,267	Air conditioners and heaters, radiators, radiator fans, fuel injection pumps, and electronic fuel injection components	Aichi
Takatana Plant	1974	363	Instrument clusters	Aichi
Daian Plant	1982	737	Ignition devices, safety-related equipment, oxygen sensors, and various other actuators and sensors	Mie
Kota Plant	1987	283	Integrated circuits and electronic control components	Aichi
Toyohashi Plant	1987	174	Air conditioner compressors and magnetic clutches and car-heater blowers	Aichi
Agui Plant	1990	283	Machinery, tools, and robots	Aichi
Kitakyushu Plant	1993	156	Air conditioners	Fukuoka
Zenmyo Plant	1998	320	Electronic fuel control injection pumps and IC cards	Aichi
DENSO Research Laboratories	1991	81	Research and development in regard to semiconductors, information and communications systems, and human interface technologies	Aichi

*The start of operations at the headquarters and Kariya Plant is recorded as the date of DENSO's independence from Toyota Motor Co., Ltd.
