# Next-Generation AI Model Development Environments

Overview

Utilizing the strengths of both J-QuAD and NTT DATA ARC, we will create development environments to support AD/ADAS, a field seeing increasing AI utilization.

・ J-QuAD: Combining the strengths of four investing companies to create appealing apps

・ NTT DATA ARC: Improving development efficiency and quality in the AI era with next-generation development environments

J-QuAD DYNAMICS Inc.
Development of integrated control software for autonomous driving, advanced driver assistance systems, automatic parking, and vehicle motion control

Feature

・ Next-generation AI model development environments capable of handling the evolution of End-to-End AI models
