

Exclusive Smart90SM Maintenance Drug List

The list below shows prescription drugs included in our Exclusive Smart90 Program. These are maintenance drugs that you must receive at a participating Smart90 retail pharmacy or through Express Scripts mail-order pharmacy for them to be covered by your plan, after your first two fills of the prescription.

Maintenance drugs are ones you take on a recurring and regular basis to treat chronic conditions. Some examples include drugs to treat high blood pressure, heart disease, asthma and diabetes.

Due to the large number of available medicines, this list is not all inclusive. This list does not guarantee coverage. Depending on your prescription drug plan, some drugs on this list may not be covered and you'll have to pay the full price of the drug. Your plan's drug list and coverage rules determine what's covered. This drug list does not affect the preventive drugs defined by the Affordable Care Act. You will continue to have no out-of-pocket cost for those drugs when you fill them at a Smart90 pharmacy. This list is current as of **March 2021** and is subject to change.

If you have any questions, call the Customer Service number on the back of your member ID card.
