### Welcome to the DENSO Gallery

The DENSO Gallery is a museum that features DENSO's past, present, and future with a wide range of its product development activities and business approaches.

Here at the Gallery, you can explore a variety of innovative products that embody our vision, our determination to advance together with various regions around the world, and people in communities, and anything about DENSO.

DENSO aims to offer sophisticated products to help create a better world.

Please share our passion for making things and our spirit of advancement for a step ahead.

**DENSO**  
 Crafting the Core

## 1 Welcome zone

Visitors are welcomed by an eco-area bordered by glass walls that seamlessly stretch into the inner garden. Powerful images play on a large 11-meter screen in this area as well.

## 2 Corporate guidance

DENSO's total strengths are represented by its global network and corporate information, 3-D images of advanced products and technologies for automobiles, and a simulator to explore fuel-efficient technologies.

## 3 History of DENSO

The history of DENSO's innovative business and product development are presented as a chronology. You will discover DENSO's nostalgic products from the beginning of the company and trace how our products have been developed.

## 4 Product and technology zone

### Automotive area

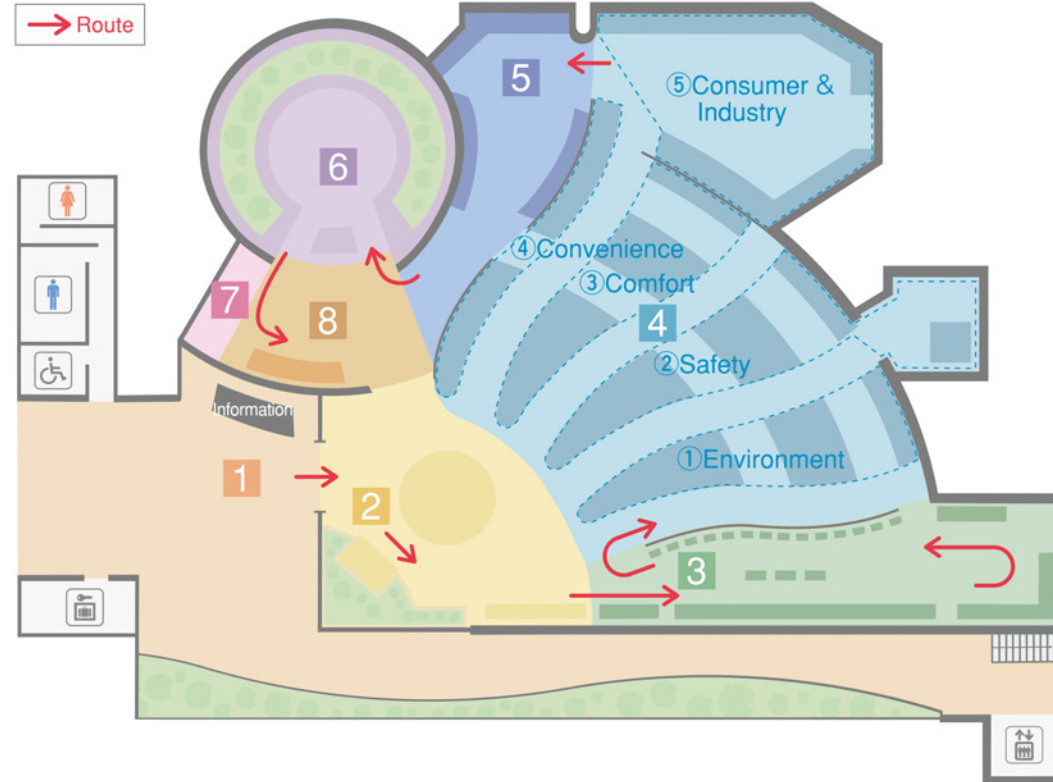

On display are the most advanced automotive products and technologies in DENSO's four areas of expertise—the environment, safety, comfort, and convenience. Environmental technologies for the harmonization of motor vehicles with the earth, safety technologies for a society free from traffic accidents, and other sophisticated DENSO technologies are presented in an easy to understand method.

### Consumer and Industrial area

Exhibits include products for daily life, factory automation, and QR codes developed by DENSO based on technologies and knowledge that DENSO has accumulated in the automotive area. Industrial robots are also demonstrated.

# The place that shows everything about DENSO, an ever-evolving company that goes beyond all expectations

To help create a better world, DENSO always tries to create new value. You may learn about every aspect of the company, including our approach for making things and the resulting products and technologies.

## 5 Driving force behind DENSO

In addition to the spirit of making things, which is the driving force behind DENSO since it started operations, our environmental efforts and corporate citizenship are exhibited in the images and panels.

As an aspect of DENSO's passion for creating high quality products, displays trace the history of our involvement in the WorldSkills Competition from almost its beginning. You will also discover DENSO's environmental efforts and corporate citizenship efforts by learning about our commitment and activities to co-exist with the global environment and develop along with regional communities.

## 6 DENSO Theater

Videos of DENSO employees at work around the world are shown on a giant semicircular screen. Touching any of the on-screen people plays a message describing what the core component of the work they do is. Do be sure to experience today's DENSO for yourself at this interactive theater.

## 7 Visual images

Images describe what DENSO is all about.

## 8 Theme exhibits

In a different perspective from a permanent exhibition, DENSO's activities are introduced with products and themes from current news.
